Hi Nikia and Daryl,

Please reference Heather's email below. We've encountered hydrocarbons during our interim "Parrot" sampling effort. Heather has notified the appropriate DEQ agency. We will be collecting some grab samples from the subdrain to assess whether or not we are capturing any HC's.

Subject: Hydrocarbon

Hi Josh,

Our field crew encountered a problem while sampling MSD-01A during the monthly monitoring activities under the Parrot Removal Monitoring SAP. I've included a screenshot of the area below. During the February event the team noticed a strong hydrocarbon odor while sampling but when checking the well with the PID and interface they did not detect anything. They also noticed the smell today and picked up a reading of 44.8 ppm from the purge water inside of the tank. The water is being transferred to a barrel to be disposed of at a later date.

I've contacted DEQ Enforcement and notified them of the situation. Please let me know if there is anything else that should be done for the time being.

Thank you,

Heather Brown | Project Engineer
